ANIMAL FACT FILE

JELLYFISH

IS AN: INVERTEBRATE

PHYLUM: CNIDARIA

HABITAT

Jellyfish live in the oceans. Different jellyfish can be found in every ocean on the planet! They can live in water that is deep or shallow, warm or cool.

INTERESTING FACT

Jellyfish can be all different colours. Most are clear, but others can be pink, blue or purple. They can even be bioluminescent, which means they produce their own light!
