COMPRENSIÓ DE TEXTOS ESCRITS (CTE)

Read the four short texts (A-D) about different people's opinions on technology. Match the questions (1-5) to the correct paragraph(s) (A-D).

Technology and Our Lives

A

Technology is a big part of my daily routine. I check my phone first thing in the morning and use it to send messages, check the news, and listen to music. It makes life easier, but sometimes I feel like I spend too much time staring at a screen instead of talking to people face-to-face.

B

I work in an office where technology is essential. I use my computer for video meetings, emails, and organizing projects. At the same time, I see the risks—many people don't think about online security, and personal data is not always protected. I believe we should all be more careful when using the internet.

C

As a teacher, I encourage my students to use technology in class. They research topics, watch videos, and even do interactive exercises on their tablets. However, I also make sure they don't rely on it too much because critical thinking and personal interaction are just as important as technology skills.

D

I enjoy using technology, but I also see its negative effects. Many people are so focused on their phones that they forget to enjoy the world around them. I've even seen families at restaurants where everyone is looking at a screen instead of talking to each other! In my opinion, we need to use technology wisely and not let it control our lives.

Who…?

1 thinks that people should use technology less? ___ , ___
2 uses technology for work? ___ , ___
3 worries about online safety? ___ , ___
4 believes that technology should not replace real-life interactions? ___ , ___
5 uses technology for learning? ___ , ___
